

# HERZZ

HERZZ is the band of the artist Tobias Herzz Hallbauer from Dresden, Germany.

Founded in 2007, the band started to use different musical materials (songs by „NICO“ and „The Velvet Underground“; pieces, based on lyrics by wellknown and unknown poets and – of course – own songs), which was played before only in soloconcerts of Tobias Herzz Hallbauer.

Today – together with drummer Stoffel Fuhrmann and bassplayer Jörg Schittkowski (former members of german Industrial-Punk-Band „Automatic Noir“) and Stefan Mieth (former member of „Mellow Stones“) on leadguitar, keyboards and other instruments – the band creates a sound between New Wave, Rock and influences of electronical music – but always with an eye fixed on POETRY...

Still a central point is the work with the music written by NICO: former topmodel and legendary member of Andy Warhol's „Factory“, but at first a great singer and writer of great songs.

From the beginning in autumn 2007 the band played a lot of concerts – for instance together with „Rummelsnuff“ and as support for „Phillip Boa & The Voodooclub“ or „Bohren & Der Club Of Gore“.

In March 2009 the band released their first EP, containing six songs from the current set.
